PROFESSIONAL SUMMARY:

Full Stack Developer with 6+ years of experience designing, architecting, and delivering scalable enterprise solutions using **Drupal (7, 8, 10)**, **Contentful**, **WordPress**, and headless CMS architectures. Specialized in custom module/plugin/Apps development, **API** integrations (REST/GraphQL), multilingual workflows, accessibility (**WCAG**), and robust CI/CD pipelines. Proficient in **PHP**, **JavaScript**, **TypeScript**, and **React**, with proven expertise leveraging modern **AI-powered developer workflows** (**GitHub Copilot**, **Claude AI**) and **agentic AI tools** to accelerate development cycles, optimize enterprise publishing pipelines, and minimize technical debt. Recognized with the **Accenture ACE Extra Mile Award** for **high-impact CMS delivery**. Skilled in stakeholder management, cross-functional solution design, and technical mentorship, consistently achieving 30% faster deployments and a 25% increase in team delivery efficiency.

TECHNICAL SKILLS:

- CMS & Headless Architecture:** Drupal (8/9/10), Contentful CMS, WordPress (Multisite), Decoupled/Headless CMS, Enterprise Content Modelling, Localization & Multilingual Workflows
- AI-Powered Development:** GitHub Copilot, Copilot Chat & AI Agents, Claude AI, ChatGPT, Prompt Engineering, AI-Assisted Debugging, Automated Code Refactoring & Documentation
- Backend Engineering:** PHP (Advanced OOP, MVC), Symfony, Twig, Node.js, Microservices Architecture.
- Frontend Engineering:** React (Component Lifecycle, State Management for Headless CMS), JavaScript (ES6+), TypeScript, HTML5, CSS3, SASS/SCSS, Bootstrap, jQuery
- CMS Automation & CLI Tools:** Drush, WP-CLI (WordPress CLI), Composer, NPM/Yarn
- Databases & Caching:** MySQL, PostgreSQL, MongoDB, Redis, Memcached
- APIs & Authentication:** GraphQL, REST, Webhooks, OAuth 2.0, Single Sign-On (SSO), Postman, Swagger (OpenAPI)
- DevOps & Cloud:** Git, Bitbucket, Docker, Jenkins, GitLab CI/CD, GitHub Actions, SonarQube, Cloudflare, AWS (S3, EC2), Azure, Acquia Cloud Platform, DataDog, ArgoCD
- Standards & Optimization:** Accessibility (WCAG 2.1 AA), Technical SEO, Google Tag Manager (GTM), Query Optimization, Performance Tuning

CERTIFICATIONS & ACHIEVEMENTS:

- Accenture Celebrates Excellence (ACE) — Extra Mile Award** | February 2025 & March 2026
- Contentful Certified Content Manager** | February 2026
- Contentful Certified Professional** | March 2025
- DevOps Academy Program (Accenture)** | March 2025
- Reinvention with Agentic AI learning program (Stanford HAI/Accenture)** | March 2026
- The Fundamentals of Digital Marketing (Google)** | August 2020

PROFESSIONAL EXPERIENCE:

Custom Software Engineering Senior Analyst | Accenture, Pune (Jun 2024 – Present)

- Delivered enterprise **Contentful-based headless CMS** applications using **TypeScript**, **React**, Next.js, enabling complex multilingual, multi-branch editorial workflows.
- Automated provisioning with **Contentful CLI & CMA APIs**, including **role-based access controls** (RBAC) setup, content model scaffolding, and **cross-space migrations**.
- Built modular content schemas mapped to frontend UI frameworks (Hero banners, Accordions, Product Pages).
- Configured **Contentful Live Preview** to enable real-time, side-by-side content rendering for content authors, drastically reducing editing friction and streamlining staging verification before publishing.
- Established automated notifications for **editorial workflow** changes, integrating email alerts and leveraging the Contentful **Tasks App** to seamlessly assign, track, and manage **team collaboration** across publishing pipelines.
- Implemented production-ready headless integrations utilizing Contentful's full API ecosystem—including **GraphQL**, **Content Delivery (CDA)**, **Content Preview (CPA)**, and **Asset APIs**—optimizing global delivery via CDNs.
- Architected scalable **multilingual** architectures and multi-branch editorial **workflows** using marketplace and contributed applications (content merge, deep-cloning utilities) to streamline cross-region content replication.

- Built **custom Contentful apps** and UI extensions that interface with external microservices to automate content governance, such as programmatic cleanup of expired asset optimizations.
- Configured comprehensive **SEO** configurations (Meta titles, Open Graph tags, and canonical slugs) directly into content models, boosting organic visibility.
- **Integrated third-party microservices** (e.g., Shopify, Cloudinary, and enterprise DAM systems) directly into Contentful spaces using Marketplace apps and custom webhooks.
- **Mentored** and guided junior developers, aligning their deliverables with enterprise standards and improving team delivery efficiency by 25%.
- **Architected** end-to-end solutions for enterprise CMS implementations, ensuring scalability and maintainability, which reduced rework and technical debt by 20% across projects
- Authored and executed **Visual Integration (VI)** test cases for custom Contentful apps, validating UI extensions against accessibility (WCAG 2.1 AA) and functional requirements, reducing post-deployment defects by 20%.

Custom Software Engineering Analyst | Accenture, Pune (Jan 2023 – Jun 2024)

- Engineered **Drupal-based headless CMS** solutions for enterprise **healthcare clients**, delivering secure and scalable digital platforms.
- Designed complex content architectures using structured **Content Types**, multi-layered **Paragraphs**, nested **Taxonomies**, and custom **Menus** to support granular categorization and advanced access structures.
- Developed contextual user interfaces by combining **Views** with **View References**, enabling editors to embed dynamic, filtered displays directly into node layouts without developer intervention.
- Built secure **custom modules** leveraging Object-Oriented PHP and **Symfony** components; implemented **core hooks** (**hook_form_alter**, **hook_preprocess_HOOK**, custom entity hooks) to safely intercept rendering lifecycles.
- Standardized multi-step customer data capture with **Webform**, integrating **Workflows** and Content Moderation to enforce strict enterprise editorial publishing cycles.
- Delivered high-performance headless CMS integrations by configuring **JSON:API** and custom **JSON Views** endpoints for seamless consumption by modern JavaScript frontend frameworks.
- Executed large-scale automated data migrations using **Migrate Plus/Tools**, mapping complex legacy fields into Drupal nodes, taxonomies, and paragraph components with zero data loss.
- **Managed** enterprise configuration pipelines, implementing **Config Split** to cleanly separate environment-specific configurations across Dev, QA, Stage, and Production tiers.
- **Contributed two custom modules** to the Drupal open-source community, strengthening platform adoption and showcasing technical expertise.
- **Actively** participated in **Scrum** ceremonies including **daily stand-ups**, **sprint planning**, and **retrospectives**, ensuring alignment with Agile delivery goals and accelerating feature releases by 15%.

System Engineer | Infosys, Pune (Dec 2021 – Jan 2023)

- Built a custom Drupal CMS backend for a **global logistics client**, streamlining content operations and improving editorial efficiency.
- **Migrated** content from legacy enterprise systems with 100% accuracy, ensuring a seamless platform transition.
- Created component-driven site structures with **Acquia Site Studio**, developing reusable layouts (Hero sections, Accordions) to enhance editor layout flexibility.
- Developed custom backend logic using **Drupal hooks** to enforce specialized business rules and alter core system rendering behaviour.
- Exposed **JSON:API endpoints** for frontend consumption and authored comprehensive **Swagger** (OpenAPI) documentation for clean API adoption across teams.
- Implemented granular access control with the **Group module**, isolating permissions across multi-tenant editorial teams.
- Managed deployments on the **Acquia Cloud Platform**, handling complex environment **workflows**, **hotfixes**, and **debugging across Dev and Staging layers**.
- Optimized search performance by configuring Acquia Search Index and fine-tuning caching layers (**Redis/Memcached**) for rapid content delivery.
- Standardized builds using Composer for backend dependency management and Yarn for frontend asset compilation.
- Ensured absolute compliance with Drupal **coding standards** using **PHPCS**, drastically improving maintainability and code quality.

- Automated synchronization workflows by setting up robust linux **CRON** jobs, ensuring reliable and timely data transfers.
- Enforced PHP code quality checks with **PHP CodeSniffer**, maintaining strict adherence to coding standards.
- Leveraged **Drush** for efficient operational tasks (cache clears, migrations, configuration imports), reducing manual effort by 20%.
- Monitored and debugged application logs using **Acquia Cloud tools**, ensuring proactive issue resolution.
- Integrated **SonarQube** into **CI/CD** pipelines for static code analysis, improving code reliability and reducing vulnerabilities
- Designed and executed comprehensive API testing suites in **Postman**, validating JSON:API endpoints, payload structures, and authentication flows to guarantee seamless frontend-backend integration.
- Authored robust automated unit and integration tests (**PHPUnit**) for custom backend plugins and modules, reducing runtime regressions and maintaining high code reliability scores in the CI/CD pipeline.

Junior PHP Developer | Nadsoft IT Solution, Pune (Feb 2020 – Dec 2021)

- Designed and implemented a custom **WordPress** website tailored to client requirements.
- Developed a complete e-commerce solution using the WooCommerce plugin, enabling secure transactions and product management.
- Optimized site visibility by integrating **Yoast SEO** for advanced search engine optimization.
- Built dynamic and responsive pages using **Elementor** page builder.
- Integrated **Google Analytics** for performance tracking and user behavior insights.
- Created interactive forms with **WPForms** to enhance user engagement.
- Developed a **custom WordPress plugin** for child theme creation and shortcode-based dynamic data loading.
- Implemented caching mechanisms to improve site performance and reduce load times.
- Engineered responsive web applications using **PHP** (Advanced OOP) and **MySQL**, with front-end development in **HTML5**, **CSS3**, **Bootstrap**, and **jQuery**.
- Engineered pixel-perfect, cross-client responsive **email templates and static HTML5/CSS3 templates** optimized for maximum deliverability and engagement across all device types.
- Set up **email marketing campaigns** using **Mailchimp** and **ActiveCampaign**, improving customer outreach and engagement.
- Configured workflow automation with **Zapier**, streamlining lead management and reducing manual effort.
- Experienced with **Jira**, **Trello**, **Slack**, **MS Teams**, **Outlook**, and Agile collaboration for project management, team communication, and sprint delivery.

EDUCATION:

- **Bachelor of Engineering in Computer Engineering** | May 2019 | CGPA: 6.98
SGBAU Amravati University, Babasaheb Naik College of Engineering, Pusad, Maharashtra, India
- **Diploma in Computer Engineering** | May 2015 | Percentage: 60.58%
MSBTE, Kalawatibai College of Engineering & Technology (Polytechnic), Naigaon (BZ), Nanded, Maharashtra, India
